****The Architecture of Power: Political Science, Political Practice, and the PS Nexus in Global Governance**** The interplay between political science and political practice—what scholars term the "PS political science and politics" nexus—forms the backbone of modern governance, shaping how states function, how societies evolve, and how global order is contested and constructed. This relationship, neither static nor purely theoretical, is a dynamic field of struggle, adaptation, and reinvention, rooted in centuries of philosophical inquiry, institutional innovation, and geopolitical transformation. To understand the contemporary landscape, one must trace the lineage from classical political thought through 20th-century paradigm shifts, analyze the economic and structural

forces that reconfigured political systems, and assess how digital disruption, ideological fragmentation, and systemic crises are redefining the very meaning of political agency. The origins of political science as a distinct discipline are often traced to the early modern European state system, crystallized in the Peace of Westphalia (1648), which institutionalized the sovereign nation-state as the primary actor in international affairs. But the intellectual groundwork was laid long before, in the works of Thucydides, whose *History of the Peloponnesian War* dissected power, fear, and ambition not as abstract virtues but as material drivers of state behavior. Machiavelli's *The Prince* (1532) later formalized the recognition that political efficacy often required a pragmatic departure from moral idealism—a foundational tension that persists: the ideal of governance versus the reality of power. By the 18th and 19th centuries, political science matured alongside the rise of liberal democracy, industrial capitalism, and colonial expansion. Thinkers like Rousseau, Locke, and later Marx introduced competing visions of legitimacy, ownership, and social contract—frameworks that would underpin revolutions, constitutions, and ideological struggles. The discipline itself began to institutionalize in the late 19th century, with the founding of the American Political Science Association (1903) and the expansion of university-based research. Yet, early political science remained largely normative,
