The Bengal tiger, **Panthera tigris tigris**, etches its presence not through conquest, but through absence: the shrinking territories, the vanishing roars, the ghostly footprints left in dust that no longer hold the weight they once did. Beneath this symbolic fading lies a deeper, more urgent narrative—one that unfolds not in the wild, but in boardrooms, war zones, diplomatic corridors, and the quiet rooms of journalists like me who track the tremors behind the tiger's tears. These tears are not merely biological; they are metaphors for a world grappling with the collision of power, fragility, and transformation. The title—**Tears of a Tiger—Questions and Answers**—is not a headline, but a diagnostic lens: a framing of the tiger as both predator and prey, a mirror to human ambition, and a litmus test for our collective reckoning. To understand the full gravity of this metaphor, one must begin not with the animal, but with the origins of a name forged in imperial ambition and colonial extraction. The tiger's symbolic journey—from the sacred **Shere Shah** of Mughal lore, where kings claimed divine right through tiger hunts, to the colonial gaze that cataloged, hunted, and ultimately nearly extinguished the species—establishes a lineage of power defined by dominance and loss. The British Raj transformed the tiger into a trophy, a commodity, and a symbol of untamed Asia, immortalized in paintings, taxidermy, and administrative records that recorded its decline as a civilizing mission.
