Historical Background and the Origin of Sector Classifications

The division of economic activities into sectors dates back to the 19th century, primarily attributed to the work of French economist Jean Fourastié. Originally, the economy was segmented into three primary sectors: 1. Primary Sector: Activities involving extraction of natural resources—farming, fishing, mining, forestry. 2. Secondary Sector: Manufacturing and industrial processes that transform raw materials into finished goods. 3. Tertiary Sector: Services that support the economy—retail, entertainment, financial services, healthcare. These classifications recognize the increasing importance of knowledge, innovation, and specialized decision-making in modern economies.
