The Political Science Theory and Practice of Muzzahir Haqq: A Scholar, Strategist, and Quiet Architect of Geopolitical Discourse

Muzzahir Haqq—often referred to in academic and policy circles as a pivotal figure in post-colonial political science—represents a rare synthesis of intellectual rigor, institutional influence, and practical engagement with the shifting

tectonics of global power. His work transcends conventional boundaries between theory and practice, offering a layered critique of statecraft, ideology, and the structural contradictions embedded in modern governance. To understand Haqq is not merely to trace a biography but to navigate a living archive of how political thought evolves under pressure from empire's afterlives, economic volatility, and ideological fragmentation. Born in 1948 in Lahore, then part of British India, Haqq emerged during a decade that defined the post-imperial condition: a period when nascent states grappled with the legacies of colonial administration, the ideological ferment of Cold War bipolarity, and the urgent need to define national identity amid competing visions of development. His early education at Government College Lahore immersed him in a curriculum steeped in both Western political philosophy—Hegel, Marx, Weber—and the urgent critiques of dependency theory emerging from Latin America and South Asia. This dual foundation became the bedrock of his lifelong analytical framework, which rejected reductive dichotomies between modernity and tradition, or democracy and authoritarianism, in favor of a dialectical understanding of power. Haqq's academic trajectory was shaped by the 1965 and 1971 wars between India and Pakistan—conflicts that crystallized his understanding of how political science must account for not just abstract principles but the visceral realities of sovereignty, legitimacy, and national trauma. After earning a PhD in Political Theory from the University of Edinburgh, he returned to Pakistan, where he joined the Department of Political Science at the University of Karachi. There, he transformed a department historically focused on classical Western theory into a hub of critical inquiry into post-colonial governance, state formation, and the political economy of underdevelopment. His seminars became legendary: students remember long nights dissecting the contradictions of "developmental authoritarianism," the performative nature of electoral democracy under military rule, and the way international institutions often reinforced rather than rectified structural inequities. Central to Haqq's theoretical contribution is his concept of "fractured sovereignty"—a framework developed in his
