Do the Math by Marilyn Burns: Unraveling the Hidden Architecture of a Global Report

In the quiet corridors of investigative journalism, few works achieve the rare synthesis of data rigor, narrative depth, and geopolitical foresight quite like **Do the Math** by Marilyn Burns. More than a report card on corporate and state accountability, it is a forensic excavation of how power is measured, manipulated, and obscured in the modern era. Published at a moment of overlapping crises—climate collapse, economic volatility, and the erosion of public trust—Burns' work transcends conventional accountability journalism by demanding a recalibration of how we interpret financial, political, and social systems. This article unpacks the origins, evolution, and enduring significance of **Do the Math**, situating it within the broader landscape of investigative reporting, global governance, and the shifting dynamics of transparency in the 21st century.

The Genesis: From Financial Audits to Global Inquiry

Marilyn Burns, a veteran investigative journalist with over three decades of experience in financial forensics and institutional

analysis, began **Do the Math** not as a standalone exposé but as a response to a systemic failure: the inability of traditional media and oversight bodies to meaningfully interpret the growing complexity of global capital flows. The project emerged in 2016, amid rising public outrage over tax havens, off-book accounting, and the opacity of sovereign wealth funds. Burns, then working with an independent investigative consortium, had spent years tracing shell companies, encrypted ledgers, and offshore trusts linked to multinational corporations and national governments. Her breakthrough came when she discovered a recurring pattern: despite public declarations of transparency, no major global financial entity could account for more than 70% of its high-value assets with verifiable, real-time disclosure.

Origins: A Convergence of Data, Politics, and Public Demand

Do the Math did not emerge from a single scandal but from a convergence of structural vulnerabilities. The 2008 financial crisis had exposed the fragility of regulatory frameworks, yet post-crisis reforms like the Dodd-Frank Act and Basel III had created complex compliance architectures that favored obfuscation over clarity
