Overview of Fort Leonard Wood Basic Training Units

Fort Leonard Wood is primarily known for its role in training Combat Engineers, Military Police, and Chemical, Biological, Radiological, and Nuclear (CBRN) specialists. Unlike traditional infantry basic training that is conducted at other posts such as Fort Benning or Fort Jackson, the basic training units at Fort Leonard Wood are tailored to meet the demands of specific Military Occupational Specialties (MOS). The fort's basic training units are organized into several battalions and companies, each responsible for guiding recruits through a rigorous process that combines physical conditioning, technical skills development, and leadership training. This specialized approach ensures that soldiers are not only physically prepared but also possess the technical expertise required for their respective fields.

Key Training Units and Their Functions

- ****1st Engineer Training Battalion****: This unit is dedicated to training Combat Engineers. Recruits here are taught essential skills such as construction, demolition, and obstacle breaching. The training emphasizes both physical endurance and technical proficiency in engineering tasks critical to battlefield success. -

****94th Engineer Battalion (Military Police)**:** The Military Police training unit focuses on law enforcement, security operations, and detainee handling within military contexts.
