## Sample Medical Coding Exam Questions and Answers

Let's look at a few sample questions to illustrate how medical coding exam questions and answers are structured, along with explanations to deepen your understanding.

### Question 1: ICD-10-CM Coding

A patient is diagnosed with Type 2 diabetes mellitus with diabetic chronic kidney disease. Which ICD-10-CM code(s) should be assigned? A) E11.22 B) E11.21 C) E11.9 D) E11.29

**Answer:** A) E11.22 **Explanation:** In ICD-10-CM, diabetes mellitus codes are combination codes that include the type of diabetes and the associated complications. E11.22 specifically indicates Type 2 diabetes mellitus with diabetic chronic

kidney disease. This is more accurate than E11.21 (with diabetic nephropathy) or E11.29 (with other diabetic kidney complications). E11.9 is for Type 2 diabetes without complications.

## Question 2: CPT Coding

Which CPT code is appropriate for a standard office visit for an established patient? A) 99201 B) 99212 C) 99385 D) 99204

**Answer:** B) 99212 **Explanation:** CPT codes 99211-99215 are used for office or outpatient visits for established patients, with 99212 representing a straightforward visit with minimal complexity. Codes 99201 and 99204 are for new patient visits, and 99385 is for an initial preventive medicine evaluation.

## Question 3: HCPCS Level II Coding

A patient receives a wheelchair through a durable medical equipment provider. Which HCPCS code category would you use to report this service? A) A0000-A9999 B) E0100-E8002 C) J0000-J9999 D) L0000-L9999 **Answer:** B) E0100-E8002

**Explanation:** The E codes cover durable medical equipment (DME), including wheelchairs. The A codes are for ambulance services, J codes cover drugs administered other than oral method, and L codes are for orthotic and prosthetic procedures.
